Customized Programs for Small- to Medium-Sized Accounts

Since not all employers want or need our most extensive safety services, we have introduced an easy-to-use [Loss Control Program Guide](#) designed especially for small- to medium-sized accounts. Unlike standard accident prevention typically geared to large-scale operations, this package is user friendly and produced for employers who are interested in safety strategies but who do not need a task force to introduce them. Highly flexible, these materials feature a simple outline of nine steps to be followed and the required resources to get started: safety posters, loss control video lists, accident report forms, return-to-work guidelines, hazard and inspection checklists, etc. All information is clearly and concisely explained and can be further customized for specific classes of business or particular needs. Also, our team of loss control representatives is on hand to answer your questions.
